END OF THE WORLD OR BEGINNING OF A NEW AGE???
12/21/2012 END OF THE MAYAN CALENDAR

BY SHARON JACKSON, MS, M.MSC

Exodus 4:16 "And he shall speak for thee to the people, and he shall be thy mouth, and thou shalt be for him in things pertaining to God."

From Wikipedia, the free encyclopedia

The 2012 phenomenon comprises a range of eschatological beliefs according to which cataclysmic or transformative events will occur on 21 December 2012. This date is regarded as the end-date of a 5,125 year-long cycle in the Mesoamerican Long Count Calendar. Various astronomical alignments and numerological formulae have been proposed as pertaining to this date, though none have been accepted by mainstream scholarship.

A New Age interpretation of this transition is that this date marks the start of time in which Earth and its inhabitants may undergo a positive physical or spiritual transformation, and that 2012 may mark the beginning of a new era. Others suggest that the 2012 date marks the end of the world or a similar catastrophe. Scenarios suggested for the end of the world include the arrival of the next

solar maximum, an interaction between Earth and the black hole at the center of the galaxy, or Earth's collision with a planet called "Nibiru".

Scholars from various disciplines have dismissed the idea of such cataclysmic events occurring in 2012. Professional Mayanist scholars state that predictions of impending doom are not found in any of the extant classic Maya accounts, and that the idea that the Long Count calendar "ends" in 2012 misrepresents Maya history and culture. Astronomers and other scientists have rejected the proposals as pseudoscience, stating that they conflict with simple astronomical observations and amount to "a distraction from more important science concerns, such as global warming and loss of biological diversity."

Continued... END OF THE WORLD OR BEGINNING OF A NEW AGE???

12/21/2012 END OF THE MAYAN CALENDAR BY SHARON JACKSON, MS, M.MSC.

**LIVE NOT IN FEAR AND
LET FEAR NOT LIVE WITHIN YOU**

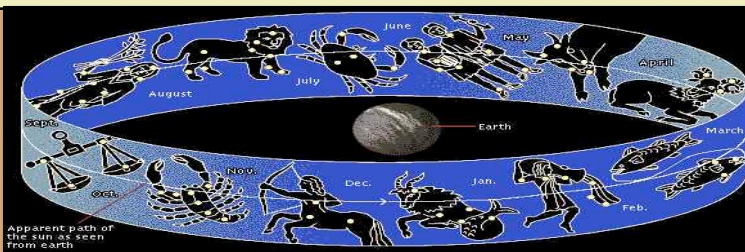

The book and other encoded inscriptions on buildings and surviving stone monuments found mostly in the ruins of the Yucatan Peninsula, include a calendar that is so accurate it puts our present system of measuring years to shame."

The origins of the Mayan calendars are obscured by time. The Mayas themselves were adept sky watchers. Their classical period is thought to be from 200-900 A.D.

The Mayan Mysteries, "One of the great mysteries of modern times is the Desden Codex, one of the few surviving books from the ancient Mayan civilization that existed in Central and South America. This book, decoded by a German scholar in 1880, opened a door to discovery of the brilliant minds of the Mayans. The Codex is filled with numeric equations based upon the movement of the planets, the sun and the stars. However, large ruins with Mayan features have been found dating back to before the time of Christ. The Mayans attributed the origin of their incredibly complex calendar system to a people who existed before them, whose origin was lost in the past.

Some observers say this alignment with the heart of the galaxy in 2012 will open a channel for cosmic energy to flow through the earth, cleansing it and all that dwells upon it, raising all to a higher level of vibration.

We should all look forward to having our vibration level increased. However, the mundane facts indicate that the Maya kings and nobles focused more on short-term projects like enriching themselves and building monuments (Diamond 2005: 177) than in predicting the dawning of the Age of High Vibration long after their civilization had collapsed.

A Brief History of the Apocalypse

"The 21st century has begun in earnest! And despite the cries of doomsayers, psychics, and prophets, the world has not come to an end! Is the idea that the end is near a recent phenomenon? Far from it. Indeed, Chicken Littles have crying doom since ancient times. The aim is to debunk end-time prophecy by listing hundreds of failed doomsday predictions, allay the fears spread by end-time preachers, and demonstrate that doom-crying is nothing new."

Some 2012 theorists speculate that the magnetic field will continue to weaken until it reaches "Zero Point." Some go further to state that when the magnetic field reaches "Zero Point" it will melt the mantle of the earth, allowing the surface of the earth to easily rotate, thus strengthening their theory of a rapid geographic pole shift. Neither of these theories are based on scientific data.

During magnetic pole shifts, the field remains intact, although it can get a bit crazy. Scientists believe that after a magnetic pole shift, the poles rapidly stabilize. Until then, it could create havoc for satellite based systems such as the internet, cell phones and GPS.
