Scenar® Therapy
Non Evasive Pain & Aliment Treatment
 BY SHARON JACKSON, MS, M.M.S.C.

SCENAR® stands for Self-Controlled Energo Neurone Adaptive Regulation. This small hand held device was invented in Russia for the treatment of Cosmonauts in space, where conditions render pharmaceutical treatments impractical. The Scenar® uses harmless electrical impulses to stimulate the internal pharmacy via a cascade of neuropeptides, the body's intercellular messengers. Healing can then take place naturally and without the need for external medication. Physical trauma such as stokes or broken limbs can be healed in a matter of hours if treatment is given quickly.

activators such as neuropeptides, 5 HT, and other body mind stimulators. Biofeedback elements introduce the scope for remarkably rapid healing, as changing fixed resonances and a repetitive central nervous system pattern restores integration. The aim is to stimulate the body's own endogenous energies to effect the cure, using as a mediator out own internal pharmacy of neuropeptides. This allows the body its own choice of healing ingredients. Biofeedback and interaction is formed between the tissues and the instrument. Each new signal evolves as a new output. No two consecutive signals from the device are the same. This allows the treatment to be truly dynamic, adjusting to changes in the body through time and in different physiological states.

Scenar® therapy is a genuine revolution in healing technology. This space age healing device produces impressive results in a short course of treatment. You can expect dramatic improvements as case studies have documented.

The device is very safe; the impulse times are very short. No pain is usually felt but the patient is aware of a tingling sensation while it works. The practitioner seeks for what is termed asymmetry, meaning something different about the tissue characteristics in the vicinity. There are five main criteria: continued...

The Scenar® stimulates the body's own pharmacy with harmless electrical impulses via skin nerves. The brain mediates a bio-energy feedback by altering output every few milliseconds. No two successive impulses are the same. There is a natural, dynamic dialogue between brain and body. The process activates releases of biological

BY SHARON JACKSON, MS. MSC.

- 1) Discoloration (reddening or pallor)
- 2) Sensation (Numbness or hyper-aesthesia)
- 3) "Stickiness" in which the machine drags with a magnet-like quality as it is drawn over certain tracts of the skin.
- 4) Sound changes (The machine begins to chatter electronically as it hits certain zones)
- 5) Change in numerical output display

Even though it may not coincide with the obvious area of symptoms or pathology, the important point is to treat the asymmetry. When this is eliminated, recovery will rapidly follow.

The SCENAR® uses a sophisticated software program which controls and automatically changes the signal waveforms and frequencies to prevent the body from adapting to the stimulation.

It is designed for athletes to increase effectiveness, reduce the trauma downtime, and expedite the rehabilitation process.

CONDITIONS READILY TREATABLE: PAIN, CRAMPING, SOFT TISSUE INJURIES, TENDON PULLS, LIGAMENT REPAIRS, ACHING MUSCLES, EXHAUSTION, TINNITUS, DIGESTIVE DISEASES, CARDIOVASCULAR, RESPIRATORY, MUSCULOSKELETAL, URINARY, REPRODUCTIVE AND NERVOUS SYSTEMS, KNEE INJURIES, ANKLE SPRAINS, SWOLLEN MEMBRANES, HEADACHES, BACKACHES, NECK PAIN, FACIAL, SHOULDER, FEET PAIN AND INJURIES, AND SO MUCH MORE!

A summary of findings in different clinical groups on 50,000 Scenar® doctors and other practitioners includes cumulative percentages in which "effectiveness" is defined as a cure of 66% of cases and some improvement in 33% if cases.

The Revolutionary New DRUG FREE approach to Pain Relief, Post-Operative Trauma, and Nerve Pain

John's face shows severe bruising before the treatment.

The bruising and swelling is dramatically reduced 36 hours after treatment.

Case Study - John age 65

John was mugged and badly beaten around the head and face. One side of his face was swollen with the imprint of a boot. After a series of treatments his face was almost back to normal 36 hours later.
